

SMART for Linux (C1)

Beginner Four-day Training Course

Our *SMART for Linux* training course will prepare you on how to use the *SMART for Linux* program for all of your authentication, acquisition, and analysis needs. This product-centric training focuses on the premier Linux® Data Forensics program, *SMART for Linux*, throughout the four days of training. You will learn about SMART, why it is so powerful, and how it can assist you in your day-to-day work.

During our four-day hands-on training course you can expect to learn;

- How to boot and utilize the *SMART Linux Boot CD*
- How to identify the prerequisites required when installing the *SMART Linux* distribution
- How to install and customize *SMART Linux*
- How to navigate within SMART
- What the program features are
- How to identify storage devices
- How to authenticate media
- How to acquire and clone media
- How to study file systems
- How to preen file systems for only those files which matter to you
- How to create, work with, and manage Cases
- How to create smart search terms and distinguish between different search term types
- How to create and edit your SMART report
- How to wipe media

Throughout our training we will focus on real world scenarios and provide examples that you can expect to see in your day-to-day case work. This is a hands-on training course and every topic will be underlined and reinforced by one or more examples. There will be a cumulative practical on the final day of training to tie everything in together and drive home the key topic areas covered during the course.

Prerequisites

This course is intended for forensic practitioners, incident response team members, disaster recovery professionals, and anyone whose job duties include acquiring and analyzing digital data. No prior experience with either the Linux® operating system or *SMART for Linux* is required, and you do not need a background in forensic investigations.

Course Pricing

- \$1,500 (US) base price C1
- \$2,000 (US) C1 with one *SMART for Linux* Law Enforcement license
- \$3,000 (US) C1 with one *SMART for Linux* Corporate license

Course content and prices are subject to change without notice. Please contact ASR Data for the latest pricing and list of available dates. If you are interested in having a custom training course at your facility for your team we will be happy to work with you in fulfilling your needs and requirements.
